The Ashcourt Group are a Hull based family run organisation which have expanded significantly since our humble beginnings in 2009 and now have over 400 employees.

We currently operate throughout the entirety of East, West and North Yorkshire and North Lincolnshire. We are able to provide a fully integrated solution which ensures a streamlined service for all our clients and enables us to assist with every step of a project.

OUR VALUES

Expertise

At the Ashcourt Group, we have invested significantly in our people through continuous training and development. We employ highly skilled and experienced individuals from a range of backgrounds means we can deliver the results our clients expect.

Quality

We believe in providing both a quality product and service. This often does not mean doing things the easy way, but rather the best way.

Future Proof

At the Ashcourt Group we have sustainability at the heart of our operations. Whether that means sourcing sustainable raw materials or investing in the latest machinery and livery, it is something we pride ourselves on.

WASTE MANAGEMENT & RECYCLING CENTRE

At Ashcourt we offer a range of skip sizes from mini skips to large skips for major building projects, allowing our customers to carefully select the skip that's right for them. Our skips are available for hire for just a day or for weeks at a time, simply speak to one of our friendly sales team on 01482 442288 to discuss your requirements. All waste is processed through our fully licenced Foster Street Recycling Centre in Hull, allowing us to minimise the amount of waste going to landfill and maximise recycling rates.

All of our skips can be delivered to your door-step within just 24 hours of placing your order. Skip hire is offered for both Domestic and Commercial use and our experienced team are on hand to advise on any queries customers may have.

We also offer a range of waste bags for smaller amounts of waste or for waste collections from locations where traditional skips may not be convenient or space is restricted. All waste bags can be purchased online via our website and include; general waste bags, green waste bags, plasterboard waste bags and metal waste bags.

AGGREGATES

We supply all grades of quarried, marine dredged and recycled aggregates to Yorkshire, Lincolnshire and the North East. Our strategically located quarries, marine wharves and recycling centres allows us to deliver quickly and efficiently using our extensive fleet of over 50 tipper wagons. Alternatively, for those customers wanting the convenience of using their own transport, we offer a collection service from all locations. We also offer a range of equipment for hire including Road Sweepers, Grab Wagons and Tipper Wagons.

Products

We offer a range of products for collection or delivery. These include:

- Limestone
- Decorative Aggregates
- Type 1 Crushed Concrete
- 6F5 Crushed Brick
- Chalk
- Topsoil
- 10mm & 20mm Recycled Pipe Bedding Gravel
- Tarmac Planings
- Sub Soil
- Bagged Aggregates

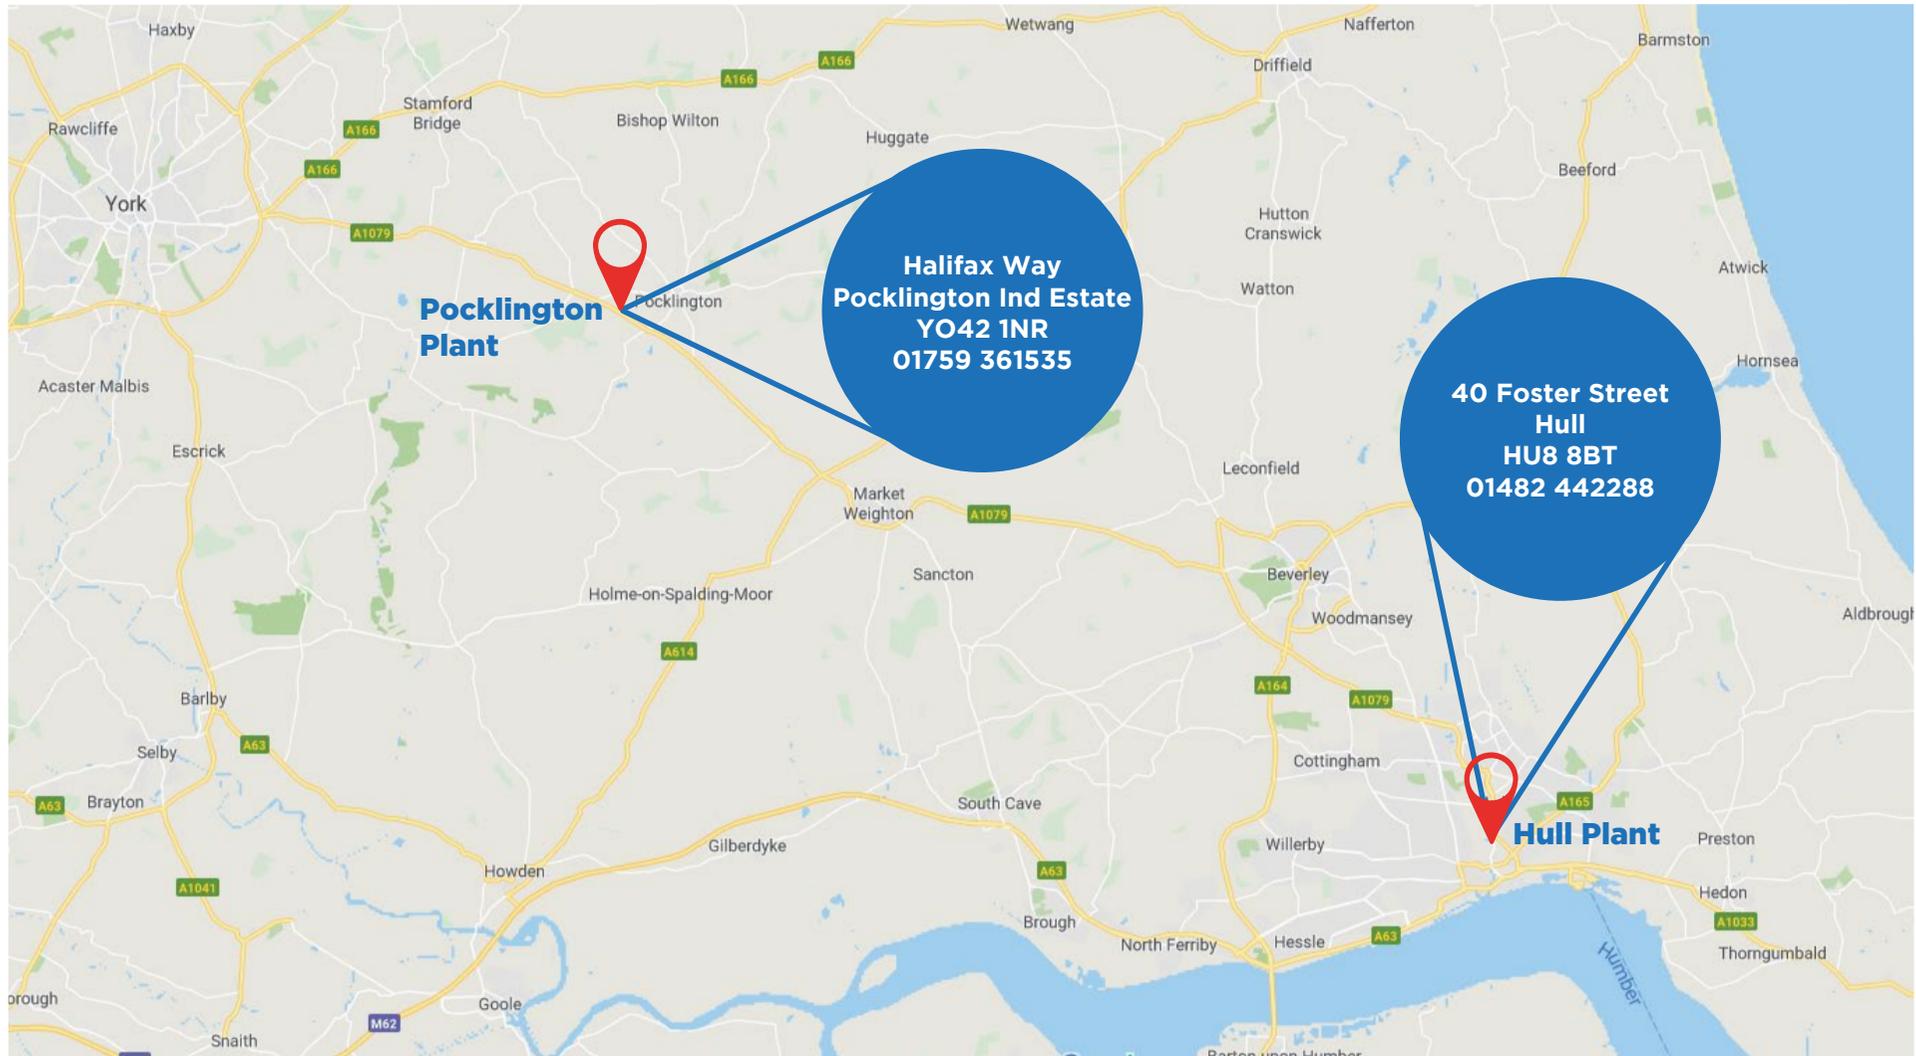

Plus many more. If you have any other requirements, contact us on 01482 442288.

AGGREGATES

CONCRETE

Our strategically located concrete plants enable us to supply sites throughout Hull, and across North, East & West Yorkshire quickly and efficiently. Our two Liebherr twin shaft wet batch plants are each capable of producing 110³ per hour of compacted concrete, with silo capacity of 400 tonne and aggregate capacity of 650 tonne. Thus making our concrete plants the largest and most technically advanced concrete production facilities in Yorkshire.

CONCRETE SERVICES

Our excavators range from 1.5 tonne excavators to 70 tonne and all our plant can be hired out as part of a wider project or as a simple single vehicle hire.

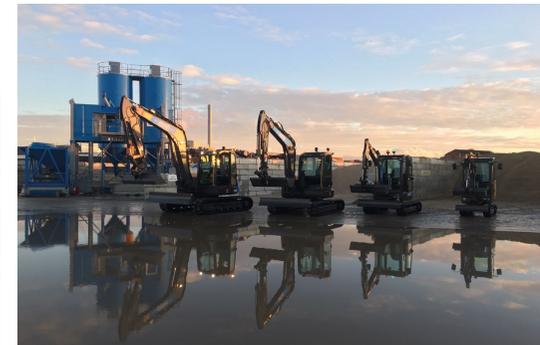

Our fully qualified Ashcourt team can advise on the best plant options available to you based on the requirements of your project to ensure all your needs are taken care of and help you to avoid costly oversights.

All of our Ashcourt plant operators are trained and CPCs qualified for the relevant plant vehicles to ensure you receive the highest level of service.

PLANT HIRE

With over 500 tonnes of plant, we are able to offer a wide range of plant available for short or long term hire.

- Excavators
- Loading Shovels
- Crushers & Screeners
- Articulated Dumpers
- Dozers
- Telescopic Handlers
- Compaction Equipment
- Attachments

HIGHWAYS

What sets the Ashcourt Highways division apart from our competitors is our unique ability to deliver a fully integrated solution to our customers.

We provide the following services:

- Traffic Management
- Road Planing
- Surfacing
- White Lining

Our highways division allows for increased efficiency and a single contact to replace the time consuming and often costly situation of dealing

LOGISTICS

We offer a full range of Haulage Services throughout Yorkshire and the North East including bulk and specialist heavy haulage solutions.

In addition to general haulage we also offer:

- HIAB Hire
- Specialist Heavy Haulage
- Temperature Controlled Haulage

General Haulage

Our wide ranging fleet of bulk tippers, curtain siders, walking floors, flat beds and step frame trailers enable our experienced operators to complete almost any haulage task required throughout the UK.

HIAB Hire

Our HIAB lorry can lift up to 9 tonnes or 2 tonnes at a reach of 20 metres and is able to lift generators and portable cabins. It is also equipped with a beaver-tail facility for small plant etc. We offer risk assessments and method statements to provide our customers with a fully integrated solution.

Temperature Controlled Haulage

Our temperature controlled trailers enable us to transport goods under optimum conditions, whether it be chilled fresh fruit and vegetables or ambient temperature medical supplies.

Specialist Heavy Haulage

Our flagship Volvo FH16 750 is plated to a maximum gross train weight of 180 tonnes, allowing us to transport loads of up to 100 tonnes with ease. We also have experience in moving a variety of abnormal loads, from modular buildings to bespoke plant and equipment.

CONSTRUCTION

At Ashcourt our general philosophy is to look into the whole life cycle of a project and devise the most efficient solution.

CONSTRUCTION

Our construction division has the experience and proven track record of delivering a range of residential, commercial, industrial and leisure projects to the highest standards. Our clients benefit from our forward thinking, open approach to construction, which we believe reduces risk and delivers value.

We offer a one stop construction solution managing the development process from land assembly, acquisition, design and planning through to construction delivery.

We aim to provide tailor made solutions for our development projects, rather than adopting a one size fits all policy. We firmly believe that a new building should not be viewed in isolation but as part of the wider surroundings.

We are passionate about ensuring our developments are as environmentally sustainable as possible, whilst maintaining maximum desirability for clients and potential occupiers.

CIVIL ENGINEERING

At Ashcourt, we pride ourselves on our valued experience we have gained by working on a range of high value and complex groundworks projects. We have experience at all levels in projects of all sizes and complexities, from minor earthworks right through to multi-million pound industrial and power generation projects on housing developments.

CIVIL ENGINEERING

Our Civil Engineering division comprises of four main areas:

- Site Remediation
- Bulk Excavation
- Groundworks
- Reinforced Concrete Structures

We offer a full site remediation service from demolition of existing structures through to treatment of contaminated ground. When required, we can also appoint a third party remediator who will manage the entire process making it hassle-free from start to finish.

FUELS

Fuel Services

We supply domestic, commercial and agricultural fuel throughout North and East Yorkshire and North Lincolnshire including:

- DERV
- Gas Oil
- Home Heating Oil

DEMOLITION

From internal strip outs to full building demolition, we're able to provide full demolition and earthwork services across the UK for a range of commercial customers in a variety of sectors.

Services

- Demolition
- High Rise Demolition
- Reclamation Of Building Materials
- Asbestos Removal
- On-site Crushing & Screening
- Internal Strip Outs
