

ASHCOURT

— GROUP —

Your sustainable construction materials
& recycling partner

Ashcourt Lincolnshire

Who is Ashcourt Group?

Ashcourt Group is a family-run organisation and a leading supplier of construction materials and waste management solutions. Since the group's inception in 2009, we have expanded significantly through organic growth and a number of strategic acquisitions.

We provide a fully integrated solution that ensures a streamlined service for all clients. The multi-faceted divisions of the group enable us to facilitate all requirements of construction projects, supplying products such as quarried and recycled aggregates, ready-mix concrete and a range of complimentary services such as the supply of waste management solutions.

Where does Ashcourt Group operate?

To date, the company has just over 1,000 employees and operates across Yorkshire, Lincolnshire and the North East, with plans to expand nationally. We currently have several strategically located aggregate outlets, six ready-mix concrete plants, multiple wash plants and other recycling facilities, and have a fleet in excess of 220 HGVs out on the roads daily, servicing our customers across the construction industry.

We work with a variety of clients including a number of blue chip companies, national construction companies, local councils and a range of agricultural, commercial and domestic customers.

What sets Ashcourt Group apart?

Ashcourt Group understands now more than ever that clients are looking to partner with reliable construction suppliers that are capable to assist with every step of a project. The seamlessly integrated divisions of Ashcourt Group provide a streamlined service with quality and expertise at the heart of everything we do.

We strive to be dynamic and innovative leaders in all sectors in which we operate. This is evidenced through our continued reinvestment into the business and our ongoing commitment to achieve our sustainability targets, thus helping our customers to achieve their own environmental and sustainability goals.

AGGREGATES

**DELIVERY • COLLECTION • MUCK AWAY
GRAB WAGON HIRE**

Ashcourt Aggregates is an efficient, reliable and independent aggregate supplier who focus not only on the quality of products that we provide, but also a high standard of customer service.

Our impressive range of tipper wagons are modern and fitted with top-of-the-range safety features. They are available for hire seven days a week and can hold up to 20 tonnes of material.

We have installed a number of state-of-the-art aggregate wash plants situated across Yorkshire, Lincolnshire and the North East, which means we are a trusted supplier of both quarried and recycled aggregate products.

ASHCOURT
— GROUP —

OUR PRODUCTS

QUARRIED, WASHED & RECYCLED

We produce and distribute a wide range of high-quality aggregate products derived from a network of quarries, wash plants and overseas imports. Having operated within the aggregates industry for many years, we offer a wealth of experience and specialist advice on our extensive product portfolio.

LIMESTONE PRODUCTS

We provide all grades of quarried and bulk fill limestone which are commonly used as general fill aggregates due to them being strong, versatile and cost-effective. Our limestone products are also available in grading to dust.

RECYCLED AGGREGATES

YOUR SUSTAINABLE AGGREGATE PROVIDER

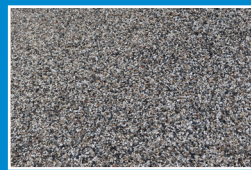

Our wash plant is capable of producing 120 tonnes of recycled products per hour providing sustainable solutions for your projects from a trusted and reliable supplier of recycled aggregates.

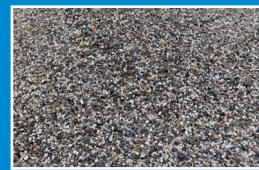

40-80mm Clean

WASH PLANT PRODUCTS

Our state-of-the-art plant is capable of recycling spoil and subsoil through an extensive washing process then screening the aggregates into different sizes and products.

10mm Pipe Bedding

20mm Pipe Bedding

Washed Soft Sand

Washed Sharp Sand

MUCK AWAY SERVICES

Our large fleet of wagons provide us with the capability to remove even the largest quantities of spoil from site quickly and efficiently. The spoil is then processed by our wash plant to produce a range of recycled aggregates.

GRAB WAGON HIRE

We have a fleet of 8 wheel grab wagons available to hire on a day-rate or priced per job based on load weight. These are available to hire between Monday-Saturday.

CONCRETE

DELIVERY • COLLECTION • PUMP HIRE TECHNICAL ADVICE

We are a leading supplier of ready-mix concrete, operating state-of-the-art Liebherr Betomix 2.66m³ twin shaft wet batch concrete plants, capable of producing 110m³ per hour of compacted concrete with a silo capacity of 40 tonne and an aggregate capacity of 650 tonne.

Our strategically located concrete plants allow us to easily deliver our products to a wide range of places throughout Yorkshire, Lincolnshire and the North East, with our extensive fleet of mixer wagons capable of servicing the largest of pours quickly and efficiently. Alternatively, our customers can collect concrete directly from one of our plants.

Our experienced concrete team have a wealth of knowledge and expertise, meaning they can provide technical advice and specification guidance relating to mix designs and suitable products from a project.

ASHCOURT

— GROUP —

OUR PRODUCTS

STANDARD, PREMIUM & REINFORCED

We have established a reputation for reliability and excellent quality of service. We are able to assist you in choosing the right mix for the job and offer assistance with any technical related queries.

READY-MIX CONCRETE

Suited to building sites where the correct ratio of concrete is essential.

FIBRE REINFORCED

Provides a high strength concrete for long-lasting solutions with no steel mesh required.

PREMIUM FLOW

A self-compacting concrete ideal for foundations.

CEMFLOOR SCREED

Free-flowing cement-based liquid screed which is easy to install and dries reliably.

PRECAST CONCRETE

From standard blocks to custom designs, we produce durable and versatile interlocking blocks and jersey barriers.

DELIVERY

Our strategically located concrete plants allow for our customers to benefit from a fast and efficient delivery service. Our plants are equipped with quality microwave moisture sensors to closely monitor water content in the sand and gravels to ensure the accurate level of water addition required.

COLLECTION

We offer our concrete collection service from all of our concrete plants. Our concrete plants are capable of producing large amounts of concrete to help save time on your collection. We also have an expert technical team that are able to advise you on the most suitable mix for the job.

CONCRETE PUMP HIRE

We have concrete pumps with both 24m or 42m booms for hire. As one of the leading concrete specialists in our operating areas, we have the expertise to provide our pumps as well as the concrete for both small and large-scale projects.

Our skilled operators are able to access tighter areas such as city centre locations or single track roads. Our team provide full RAMS for projects and offer their expertise to find the most effective solution.

While we are able to service the concrete for most of our pump hire projects, if we are unable to service the concrete, we offer a pump hire only option. Both our 24m and 35m pumps are available for hire on half day or full day rates.

Precast Concrete Wall & Barrier Solutions

CONCRETE LEGO BLOCKS

CONCRETE JERSEY BARRIERS

Our production facilities guarantee top-quality precast concrete blocks and jersey barriers that meet the highest industry standards. We use the latest techniques and employ skilled experts to produce durable and versatile blocks suitable for various construction and agricultural applications. From standard blocks to custom designs, we have the capability to cater to your unique project requirements.

WASTE MANAGEMENT

SKIP HIRE • ROAD SWEEPER HIRE WASTE DISPOSAL

We provide a complete range of waste management services for both commercial and domestic customers. Our skips range in size from small two-yard skips to roll-on roll-off 40-yard waste containers and cater to commercial waste disposal needs including asbestos waste. All waste is returned to our dedicated waste recycling facility where we sort, process and recycle materials taken in from our skips, grab wagons and tippers.

Our modern and well-maintained fleet of road sweepers are equipped with cutting-edge technology to ensure efficient cleaning and debris removal from streets, highways, construction sites, and heavy-traffic industrial areas.

ASHCOURT
GROUP

OUR SERVICES

SKIPS, ROAD SWEEPERS & RECYCLING

SKIP HIRE 2 - 40 YARD

We accept all waste types and offer skip sizes suitable for all commercial and domestic projects.

COMMERCIAL WASTE DISPOSAL

We accept large volumes of waste at our waste management facilities where it is recycled and re-purposed.

SWEEPER HIRE

Our road sweepers are available for hire on a day rate or long term contractual basis.

ASBESTOS WASTE DISPOSAL

Our dedicated asbestos unit is a strict and safe way to dispose of any bonded asbestos.

WASTE BAGS

We have a range of waste bags available to help with your waste disposal requirements.

SKIP HIRE

We offer a variety of waste removal solutions for a range of commercial clients operating in industries such as construction, manufacturing, renewable energy, cleaning, demolition and recycling. We also work with a number of local authorities and councils on larger, longer-term contracts.

At the centre of our operations, we have multiple licensed waste recycling facilities where our collected waste is processed with a large majority of waste materials being recycled.

As well as the above, we offer additional services such as combining your skip and aggregates delivery, along with an on-site waste tipping service for customers capable of bringing their own waste to our sites.

ROAD SWEEPER HIRE

Ashcourt provide road sweepers for hire on a day rate or long-term contractual basis. Our fleet of sweepers are all within three years old and each come with an experienced, professional driver. Our drivers are all trained to the highest standards and are knowledgeable and approachable if you need to contact them with any queries or special requests before they arrive on site.

Daily Hire

We offer a competitive daily hire rate for small or short-term contracts. We can also provide hourly rates for smaller projects.

Long Term Hire

Our sweepers are available for hire on a long-term basis for large commercial projects. Ashcourt provide road sweepers on a range of large projects such as new build housing developments and have many years' experience working with national housing developers.

Our sweepers are ideal for:

Stadiums
Building Sites
New Build Housing Developments
Flood Prevention
Environmental Protection

HIGHWAYS

**SURFACING • TRAFFIC MANAGEMENT
ROAD PLANING • ROAD MARKING**

At Ashcourt, our highways division deliver efficient and quality services for safe and sustainable road networks. Recent investments into our flagship W120 planer enhances precision, quality and performance allowing us to deliver large-scale projects to the highest standard. Our accredited traffic management team plan, implement and safely deliver road and traffic solutions throughout private, public and commercial sectors.

ASHCOURT
— GROUP —

OUR SERVICES

EXPERT, PROFESSIONAL & EFFICIENT

ROAD SURFACING

Fully trained and accredited to NHSS 16, we offer a reliable and high-quality service from initial quotation to final completion.

TRAFFIC MANAGEMENT

Our traffic management team achieved the ISO9001:2015 and NHSS 12D accreditation delivering high-quality schemes.

ROAD PLANING

We have experience working on projects within both the private and public sectors, including major highways schemes and large-scale operations.

ROAD MARKING

Fully accredited to NHSS 7, we are experienced in a wide range of Road markings schemes, which include the application of thermoplastic or paints in a range of colours and designs.

SUSTAINABILITY APPROACH

At Ashcourt Group, we take our environmental and sustainable responsibilities extremely seriously and always strive to minimise the impact of our operations on the communities in which we work. As we aim to become carbon neutral, we understand the importance of reducing our carbon footprint, as well as those generated by the activities of our partners, subcontractors and suppliers.

Our revolutionary wash plants are installed throughout key locations and are capable of producing 120 tonnes of recycled products per hour. The installation of our EWT wind turbine allows an output of one megawatt to service long term power. We have also made significant investments into a range of fully electric trucks which are capable of performing regular tasks asked of our diesel-powered trucks with ease.
